QUALITÀ

Il valore aggiunto di una produzione genuinamente e integralmente "Made in Italy - Made in Gessi", emerge in ogni creazione Gessi.

The added value of a genuine, integrally "Made in Italy - Made in Gessi" production, is apparent in all Gessi's creations.

Il design oggi non può essere solo estetica, ergonomia, funzionalità e capacità di industrializzare il prodotto; il design deve tenere conto dei valori e delle preoccupazioni della società: l'ambiente, le risorse energetiche, nuove modalità dell'abitare, nuovi bisogni individuali e collettivi.

Gessi è impegnata da anni in una ricerca molto seria, per proporre, ad ogni stagione, design innovativi dal valore atemporale, nuovi concetti abitativi per il vivere di domani, resi nei materiali di più alta qualità e con la garanzia di una meticolosa produzione italiana; uguale attenzione è dedicata alla ricerca di soluzioni tecniche e tecnologiche orientate alla sicurezza e sostenibilità dei prodotti e dei processi.

Gessi aspira ad essere un posto speciale dove si sviluppano percorsi fuori dall'ordinario.

Da queste premesse nasce il progetto di "azienda-oasi" del Parco Gessi: un sito produttivo "speciale", progettato per essere funzionale ed efficiente, ma anche bello e in ogni aspetto amico del lavoratore e della natura. Il Parco realizza una scenografia di eco-architettura industriale e paesaggistica, tecnologia e design, inserita in modo armonico nel territorio; qui si concepisce e realizza, in modo totalmente integrato, ogni aspetto di una produzione destinata all'esportazione in ogni parte del mondo, con l'impiego delle migliori tecnologie oggi disponibili e con impatto ambientale nullo.

L'immagine "verde" del Parco non è che un aspetto del progetto, che in realtà fonda la sua sostenibilità ambientale su molteplici soluzioni impiantistiche tecnicamente avanzate ed ecologicamente responsabili, assolutamente uniche nel panorama industriale.

Esse vanno dagli apparati di illuminazione e ventilazione naturale, al controllo della qualità indoor, ai sistemi che garantiscono un'alta performance climatica anche attraverso il recupero e riutilizzo del calore, con attenzione all'efficienza energetica e alle emissioni nocive nell'atmosfera.

Gessi ha per prima in Europa sviluppato degli impianti "pilota" che consentono di riciclare la quasi totalità dell'acqua utilizzata, dal drenaggio delle acque del sottosuolo e riutilizzo per fini irrigui, fino alla raccolta, depurazione e riciclo delle acque di lavorazione, e ha installato 4 ettari di superficie fotovoltaica con uno tra i più innovativi ed evoluti sistemi di generazione solare a tetto che ha già iniziato a produrre energia "pulita" a fine 2010 ed eviterà l'immissione in atmosfera di migliaia di tonnellate di CO2.

L'impegno alla ottimizzazione dei processi e alla minimizzazione di sprechi e inefficienze coinvolge, attraverso il Sistema di Gestione Integrato Qualità e Ambiente, tutti i livelli dell'organizzazione aziendale. La tutela ambientale è presa in considerazione fin dalle prime fasi di sviluppo di ogni progetto relativo a processi o a prodotti: essa è vissuta dall'Azienda come una missione verso i propri clienti e un impegno a creare una mentalità che faccia diventare per tutti tale scelta una "naturale esigenza".

D'altra parte innovare significa per Gessi non solo inventare nuove soluzioni estetiche ma soprattutto soddisfare sogni e bisogni, anche quelli delle generazioni future, con nuove tecnologie, nuovi processi produttivi, nuovi materiali. Insieme all'unicità del design, alla tecnologia, il vero valore aggiunto del marchio Gessi è il suo contenuto di poesia e rispetto per il mondo.

Design today need not only be aesthetics, ergonomics, functionality and ability to industrialize the product; it should also take account of the values and concerns of society: the environment, energy resources, new dwelling customs, new individual and collective needs.

Gessi has long engaged in a very accurate study of innovative, timeless designs and new housing concepts for tomorrow's dwellings to be invariably proposed at every season - relying on the use of highest quality materials and the time-honoured tradition of meticulous Italian craftsmanship. The same level of accuracy is used in its search for technical and technological solutions so as to obtain safe and sustainable products and processes.

Gessi purports to be a 'special place' where out-of-the-ordinary fantasies come true. The new Gessi Park originates from this very idea. It was designed as a special, oasis-like production complex that combines functionality and efficiency with beauty, eco-friendliness and worker-friendliness. The Park layout mixes industrial and landscape eco-architecture, technology and design, all harmoniously integrated in the territory. This provides a perfect setting for seamless production processes where products meant for worldwide exportation are manufactured with the use of state-of-the-art technologies and zero environmental impact.

The green design of the Park is just an aspect of the overall project whose environmental sustainability rests with technically advanced, ecologically responsible and industrially unparalleled if not unique system solutions. These solutions span from natural lighting and ventilation apparatuses through indoor quality control to highly efficient conditioning and heating systems including, inter alia, systems recovering and reusing the heat produced; all devices are designed with the utmost attention to energy efficiency and abatement of polluting emissions into the atmosphere. Gessi is the first company in Europe to have developed pilot plants for recycling almost all of the water employed in production processes, e.g. systems for the drainage of underground water and its reuse for irrigation, systems for process-water collection, purification and recycling, etc. The Company has also deployed on a 4 ha surface one of the most innovative and advanced rooftop solar photovoltaic generation systems, which came into operation at the end of 2010 and will produce clean energy while avoiding thousands of tons of CO2 to be released into the atmosphere.

The commitment to optimise processes and minimise wastes and inefficiencies involves each level of the Organization through an Integrated Quality and Environmental Management System. Environment protection is a concern since the very early stages of development of any product or process project; Gessi considers it a mission towards its clients and a commitment to create a mindset for everyone to embrace environment minded behaviours and choices.

After all, for Gessi Innovation means not only inventing new aesthetic solutions but also, and more importantly, meeting dreams and needs, including those of generations to come, with new technologies, new production processes and new materials. Along with design uniqueness and technology, the real added value of the Gessi brand is indeed its content of poetry and respect for the world.

MANUTENZIONE: INDICAZIONI PER LA PULIZIA DEI PRODOTTI GESSI S.p.A.

I prodotti GESSI S.p.A. sono manufatti di differenti materiali in aderenza a ogni esigenza di mercato, design e funzionalità. Le superfici della produzione di GESSI S.p.A. sono ottenute usando i migliori materiali, approvati processi produttivi e sono costantemente valorizzati da avanzati metodi di certificazione qualitativa. Per apprezzare appieno il Vostro prodotto GESSI e per preservarne la qualità estetica, considerate quanto segue:

A) L'acqua contiene calcare in quantità variabili, il quale rimane trattenuto sulla superficie del prodotto, lasciando depositi dopo che l'acqua è evaporata. E' possibile prevenire le formazioni di depositi di calcare, e mantenere il Vostro prodotto pulito asciugandolo sempre con un panno morbido immediatamente dopo l'uso.

B) NON DEVONO ESSERE UTILIZZATI DETERSIVI, SOLVENTI, AGENTI CHIMICI, SPUGNE ABRASIVE, PAGLIE METALLICHE, ALCOOL, ECC. che danneggerebbero irrimediabilmente le superfici del prodotto, compromettendone l'estetica, la lucentezza e la satinatura. PULIRE ESCLUSIVAMENTE CON ACQUA E SAPONE NEUTRO ASCIUGANDO CON PANNI MORBIDI.

C) Pulire periodicamente il filtro dell'aeratore, dopo averlo smontato con attenzione, per rimuovere il calcare che ne ostruisce le uscite.

D) Quando si usa sapone spray, spruzzare prima su un panno pulito o su una spugna, MAI direttamente sul prodotto.
